#### First Principles of the Faith- Consequences and Questions

In our class, we hope to look at two key themes during an exploration of the first principles of our faith:

- 1) As first principles of FAITH, they are foundational ideas that we can lean upon and have faith in- because they come from a God who is faithful. When we accept them in this way, they have profound life-changing implications! These are not simply concepts that we give intellectual assent to; they are ideas with major consequences for our outlook on life.
- 2) As with all study of God's word, looking at these foundational ideas should lead to questions as we interact with and immerse ourselves in the Bible. We will invite these questions along with discussion around what you wrestle with when trying to understand the first principles. This is intended to be the core of the class.
